EDUCATION

Vellore Institute of Technology CGPA: 8.47 – M.Tech Integrated Software Engineering	<i>Sept 2022 – June 2027</i>
Narayana Junior College Aggregate: 88.2% – Higher Secondary Certificate (XII), Andhra Pradesh State Board	<i>June 2020 – May 2022</i>
Emmaus Swiss High School Aggregate: 89.6% – Council for the Indian School Certificate Examinations (CISCE)	<i>July 2006 – March 2020</i>

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C, C++
Frameworks: React.js, Next.js, React Native, Node.js, Flask, Express.js, Django, TailwindCSS, LangChain
Databases: MongoDB, Firebase, Supabase, PostgreSQL
Cloud & DevOps: AWS (EC2,S3,Glue,Athena), Azure Cloud, Git, Docker, Linux
Systems & Concepts: REST APIs, WebSockets, Apache Kafka, Machine Learning, Generative AI, RAG, Distributed Systems,

EXPERIENCE

Full-Stack Developer Intern Infyzen Software & IT Solutions	<i>June 2025 – July 2025</i>
– Developed React.js frontend components and integrated Node.js REST APIs to deliver scalable web application features. – Implemented new features, fixed bugs, and improved application performance. – Collaborated with the development team to test and deploy web application modules.	

PROJECTS

Speedzy App <i>React Native, Node.js, MongoDB, AWS EC2, Expo</i> speedzy.shop	<i>Dec. 2024 – Present</i>
– Launched a hyperlocal delivery application serving 1,000+ users across multiple service categories. – Deployed backend infrastructure on AWS EC2 supporting 500+ processed orders with admin control for 10+ delivery agents.	
AI Workflow Builder <i>React.js, FastAPI, PostgreSQL, ChromaDB, LangChain</i> GitHub	<i>Jan. 2025 – Mar. 2025</i>
– Developed a no-code AI workflow platform with drag-and-drop functionality for building intelligent AI applications. – Integrated OpenAI, Gemini, LangChain, and RAG pipelines to enable context-aware conversational AI and workflow automation. – Built scalable FastAPI backend services with ChromaDB-powered semantic retrieval for document querying and workflow orchestration.	
Stock Market Analysis <i>Apache Kafka, Python, AWS S3, AWS Glue, Athena</i> GitHub	<i>Oct. 2024 – Dec. 2024</i>
– Developed a real-time data pipeline using Apache Kafka and Python for high-throughput stock market data streaming. – Implemented cloud-based storage and analytics using AWS S3, Glue, and Athena for scalable data processing and querying. – Enabled real-time market trend analysis through an end-to-end streaming and data engineering architecture.	
FacuLytics <i>React.js, Node.js, Express.js, Machine Learning</i> GitHub	<i>July. 2025</i>
– Developed a full-stack faculty analytics platform enabling students to review, rate, and compare faculty members. – Integrated machine learning models to analyze student feedback and generate data-driven faculty insights. – Built RESTful APIs and interactive dashboards for faculty evaluation, timetable generation, and academic planning.	

CERTIFICATIONS

- **SQL and Relational Databases 101** | IBM Skills Network
- **AWS Academy Cloud Foundations** | AWS Academy

EXTRACURRICULAR

- **State-Level Runner-Up** - Titan Genius Kids Mathematics Olympiad, recognized for analytical and problem-solving excellence.
- **Event Captain & Lead Anchor** for academic and cultural events with audiences of 500+ participants.
- **Selected Declaimer** at an inter-school public speaking competition among 250+ students.
- **NSS Speaker & Stage Performer** at major institutional and community events.
